PROFILE

Software Development Engineer experienced in building scalable backend systems, AI infrastructure, and production-grade APIs using Python, FastAPI, SQLAlchemy, PostgreSQL, and Docker. Strong foundation in Data Structures & Algorithms, distributed systems, object-oriented programming, and system design.

TECHNICAL SKILLS

- **Languages:** JavaScript, C++, Java, TypeScript, SQL, Python
- **Backend:** Node.js, Express.js, SQLAlchemy, REST APIs, FastAPI
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Developer Tools:** Docker, Git, GitHub, Linux, Postman, CI/CD
- **Core CS:** DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

EXPERIENCE

Krama AI

Jan 2026 – Present

Backend Engineer (Stealth AI Startup)

Remote

- Engineered an AI-powered insurance claims processing platform using FastAPI, SQLAlchemy, PostgreSQL, and Docker.
- Designed a scalable storage abstraction layer for secure document ingestion and lifecycle management.
- Built OCR and document conversion pipelines for multi-page insurance claims into structured data.
- Developed REST APIs, asynchronous workflows, and database models following clean architecture and dependency injection.
- Improved backend reliability through structured logging, testing, and production-ready deployment practices.

KPMG

Feb 2026 – Present

ServiceNow Developer Intern

Bangalore, India

- Customized enterprise workflows using Flow Designer and server-side scripting.
- Developed Business Rules, Script Includes, UI Policies, Service Portal components, and REST API integrations.
- Collaborated with cross-functional teams to enhance enterprise ITSM workflows.

PROJECTS

LLM Inference Engine

Python, FastAPI, Docker, SQLAlchemy

- Designed a modular multi-provider LLM inference platform supporting OpenAI and Ollama using Provider Factory, Request Router, and Model Registry.
- Implemented provider abstraction, streaming APIs, dependency injection, structured logging, observability middleware, and health monitoring.
- Containerized the platform using Docker with automated CI-ready testing infrastructure.

AI-Powered Research Tool & Fake News Detection

Node.js, TypeScript, Gemini API

- Developed a SaaS platform for AI-assisted academic research and fake news detection using NLP and Google Gemini API.
- Implemented AI-powered content classification and semantic verification workflows.
- Filed a patent for the platform's architecture and intelligent document analysis workflow.

Subscription Tracker

Node.js, Express.js, MongoDB, JWT, bcrypt, Upstash Workflows, Nodemailer

- Built a subscription management platform with secure JWT authentication, automated renewal reminders, and email notifications.
- Designed scalable MongoDB schemas and implemented robust authentication, authorization, and background scheduling workflows.
- Improved reliability through secure password encryption, validation, and comprehensive error handling.

EDUCATION

Dayananda Sagar College of Engineering

2022 – 2026

B.E. Information Science & Engineering CGPA: 8.7/10

Bangalore, India

Presidency PU College

2020 – 2022

PUC (PCMB) 94%

Sira, Tumkur

CERTIFICATIONS

- ServiceNow Certified Application Developer (CAD)
- ServiceNow Certified System Administrator (CSA)
